

How to Input your Options - the non-EBacc pathway

Your screen will be similar to the example below - some students may have 3 sections or different subject options within the sections, but the process for selecting your **four** subject options is the same.

Remember to **SAVE** when you have made your option choices

Choosing your Options:

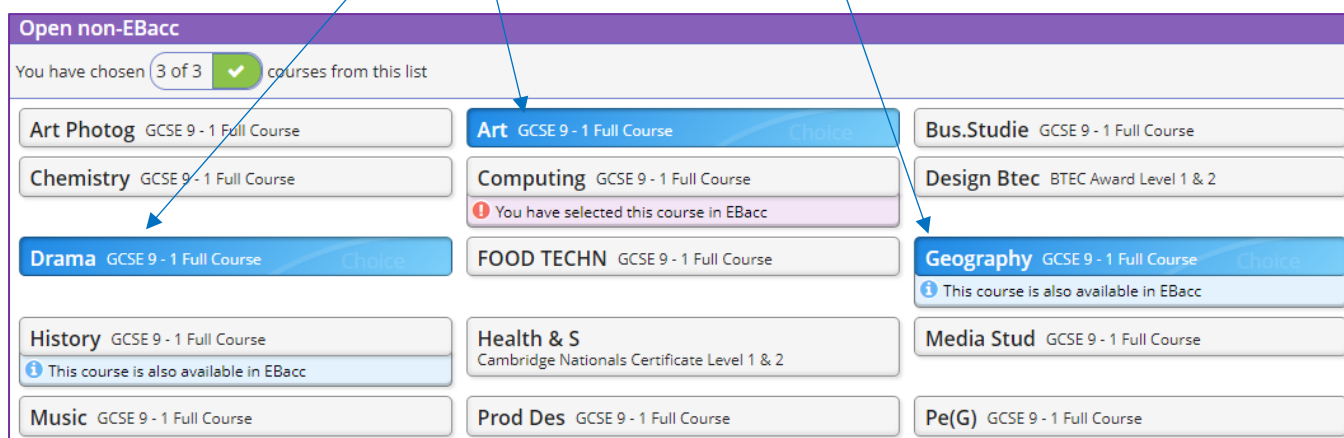

1. Make one EBacc choice by clicking on the subject name - it will turn blue.

2. To **change** an option, click on the blue subject name and the box will turn grey. Click on another subject instead - it will turn blue.

A green tick indicates that the section is complete

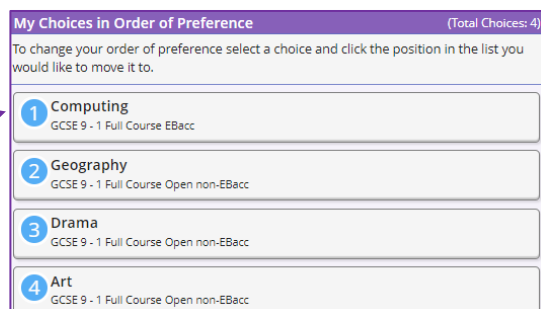

3. In the **Open non-EBacc** section, click on the names of the three further subjects you wish to study. They will turn blue. It is possible to choose other EBacc subjects in this section.

Remember: To **change** an option, click on the blue subject name. The box will turn grey - then click on another subject instead.

Ranking preferences:

4. On the right-hand side, your chosen subjects will show in **order of preference** (1, 2, 3, 4). To move a subject to a different position, click on the subject in this box (or on the blue number), then click on the position you want to move it to.

5. Remember to click **SAVE** when you have finished making your option choices
